Investors, and former
Office Director within
Bureau of Interna-
tional Security and
Non-Proliferation, US
Department of State.*

One of the most serious threats to international peace and security we face today is a terrorist with a nuclear weapon.

Among those who must be prepared to deal with this threat are the private sector utilities that control much of the nuclear power infrastructure in the United States and need to be safeguard against hazards such as sabotage and theft. Our monthly luncheon series will begin this year with a presentation/discussion led by Thomas D. Lehrman who participated in a global initiative to deter nuclear terrorism during his tenure as Director, Office of WMD Terrorism (2005-2007).
